LOBBY

Influenced by the dancing lines of a Whirling Dervish, the architecture's tiered design fans out like a spinning skirt, reinterpreting the ancient Sufi ritual for a contemporary audience. This philosophical approach extends to the light-filled lobby, where the ancient Japanese practice of Kintsugi is recrafted through the lens of modern Turkish design. Symbolized by the statement chandelier, featuring multiple resin droplets suspended between sky and earth, the resort's connection to transformational journeys is reflected through the suggestion of purification and renewal.

RESTAURANT & BARS

Paying homage to Turkey's gastronomic legacy, Reges' two restaurants present European and Aegean flavors infused with a stylish al fresco atmosphere and live music. Open throughout the day, the pan-Asian kitchen fuses ingredients and techniques from across the continents, serving inimitable mezze dishes that are bursting with taste.

Dedicated to the region's best seafood, our beach restaurant is where a daily fresh fish auction offers guests the opportunity to bid for the finest catch from local fishermen. Both restaurants use local produce to enhance every dish with ethnic appeal, from seasoning with herbs grown onsite to the inclusion of mastic gum, indigenous to Çeşme.

A unique concept that combines delicious Aegean and international dishes with exclusive selections from local and international beverages, combining stylish and signature summer cocktails.
